

Forus Electric Pvt Ltd

India's leading manufacturers of LED lighting products

To,
The Manager,
Al Sanya Co,
For General Trade,
Contracting and Transportation Ltd,
Iraq.

Dt: 28-02-2020

Dear Sir,

Please find attached details of machines, raw material, furniture infrastructure required for assembly of LED lights. As stated earlier in our letter dated 06-06-2019 and 18-12-2019 that we can also provide training and other materials like training videos and materials to train your engineers.

Thanking You

Warm Regards

Hot Plate Mini

LED and PCB Soldering Hot Plate - is flatbed micro-computer controlled heating plate. It features high-performance micro-controlled from high quality aluminum alloy which ensures fast warming, stable temperature, high efficiency, uniform heating and temperature control. We supply electric hotplate rectangular in shape to provide good base for doing LED and PCB soldering.

LUX Meter 1065

Our company is well known names in the industry engaged in offering a wide range of Digital LUX Meter. The offered meter is designed by the experts in compliance with the industry standards and is tested by our highly knowledgeable professionals on various quality parameters to ensure optimum quality.

LUX Meter 6612

Our company is well known names in the industry engaged in offering a wide range of Digital LUX Meter. The offered meter is designed by the experts in compliance with the industry standards and is tested by our highly knowledgeable professionals on various quality parameters to ensure optimum quality.

Watt Meter

The wattmeter is an instrument for measuring the electric power (or the supply rate of electrical energy) in watts of any given circuit. Electromagnetic wattmeters are used for measurement of utility frequency and audio frequency power; other types are required for radio frequency measurements. We are manufacturer and supplier of digital display watt meter in Delhi - NCR. We provide Display watt meter for LED Industry. These are portable display watt meters used to measure frequency in various factors.

MCPCB Testing Machine

We provide you high precision MCPCB testing machine to test all types of MCPCB. All MCPCB should be tested in standard environment on all parameters to make a good quality LED products.

Driver Testing Machine

Driver testing machine to test LED drivers for various products. The LED Driver Tester is designed to test drivers of different wattage as a single solution and is feature rich with capable of Measuring, Displaying and Storing the test results for management purposes.

LED Bulb Tikki Fitting Machine

All our Machines are manufactured by experts and we take care of quality of our products very much. Our led bulb tikki fitting machine will help you to press the aluminium plate (heat sink) to the level of your housing diffuser. Led bulb tikki fitting machine used for housing like Philips type 180 degree and 270 degree Syska type. This Machine helps you to fit MCPCB into housing at faster speed with more accuracy. LED Bulb Making Machine is best from Led Lights Kit and Led Bulb raw material, led lights kit, led punching machine, led bulb tikki fitting machine, led fitting machine, led press machine, led heat press machine, best led tikki fitting machine, led raw material in Delhi, led lights machine manufacturer in India, importer of led lights manufacturing machines.

Automatic Tikki Fitting Machine

All our Machines are manufactured by experts and we take care of quality of our products very much. Automatic Tikki Fitting Machine will help you to press the aluminium plate (heat sink) to the level of your housing diffuser. Led bulb tikki fitting machine used for housing like Philips type 180 degree and 270 degree Syska type.

Automatic Punching Machine

We are one of the leading suppliers, traders of Automatic Punching Machine, LED Automatic Punching Machine, LED Automatic Cap Punching Machine, LED Automatic Punching Machine. Leveraging on our vast industrial experience, we are engaged in offering Automatic LED Punching Machine. The offered Automatic punching machine is provided from us at various specifications which perfectly match customer's requirements. This punching machine is developed by utilizing high quality components along with tools & technology under the valued observance of our professionals. Along with this, our patrons can have this punching machine at the discounted rates.

LED Laser Printing Machine 20W

We provides the job work facility for all indoor and outdoor lighting products and its raw material like laser printing on LED bulb, led housing, led street light, led flood light, music bulb, mosquito killer bulb. We also provide the laser printing machine with which you can start your own business because it doesn't only print on bulbs with this printing machine you can do printing on all products made of plastic like laser printing on PC plastic, laser printing on PBT plastic, laser printing on ABS plastic and many more plastic products and it can also print on items made of metals like Iron, Steel, Aluminium. You can also do printing on mobile charger, mobiles, watches, Keychains, Pens, Laptops, Utensils, AC, Small Printers and thousands of items on which you want to print and brand name or description related to product.

DPM Watt Meter(V, I, W)

The wattmeter is an instrument for measuring the electric power (or the supply rate of electrical energy) in watts of any given circuit. Electromagnetic wattmeters are used for measurement of utility frequency and audio frequency power; other types are required for radio frequency measurements. We are manufacturer and supplier of digital display watt meter in Delhi - NCR. We provide Display watt meter for LED Industry. These are portable display watt meters used to measure frequency in various factors.

Pad Printing Machine Motorised Automatic

Single Color Motorized Pad Printing Machine

We offer our clients, motorized pad printing machine with model number BLI-55 for printing on any odd shaped and any material based surface. This is available in single color with electric control on DC drive. Our machine is designed at par with industrial standards and norms to meet the specific requirements. Machines has simplified controls, easy operations and high output, and is available in compact designs at market leading prices. Suitable for led lights brand name printing and led lights marking for brand and even for job work or printing of many kinds of electrical items like make of plastic
